

Supplement. Cultural Consensus Analysis (CCA) – Scree plots

Figure S1: CCA scree plot based on all attributes, dichotomized following (M | O | A = 1, I | R | Q = 0), omitting two respondents with zero response variance.

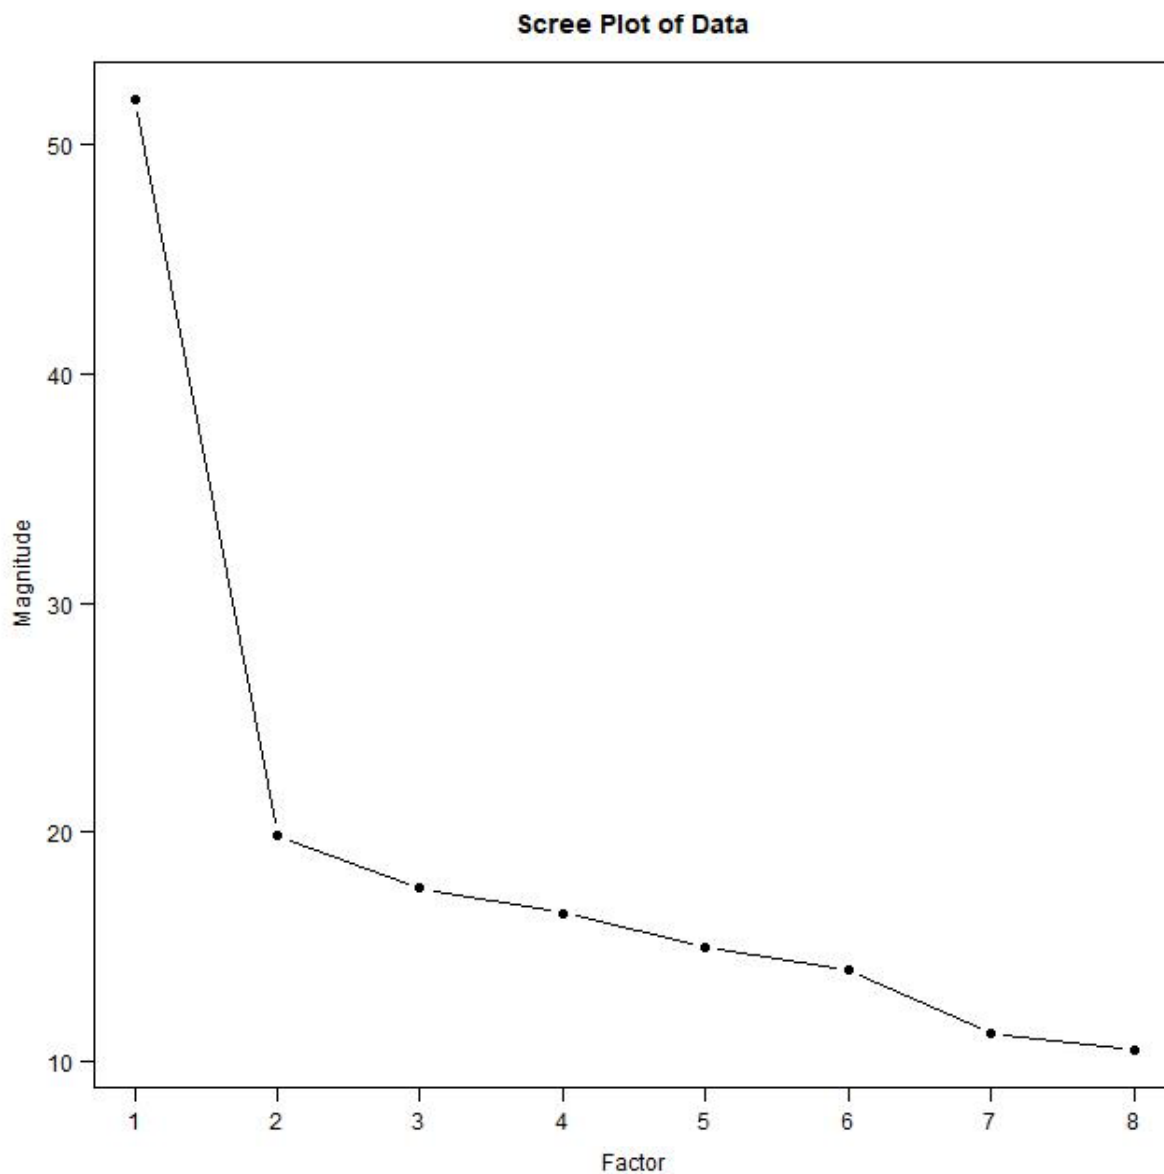

Figure S2: CCA scree plot based on all attributes, dichotomized following (M | O | A | R = 1, I | Q = 0), omitting three respondents with zero response variance.

Figure S3: CCA scree plot after removing high-difficulty items with obscure truth values (A1, B2, B3, B4R), dichotomized following (M | O | A = 1, I | R | Q = 0), omitting four respondents with zero response variance.
